

## Smart. Sustainable. Gentle on the skin.

### *Cell Solution® SKIN CARE – the skincare you wear*

Forget creams, wasting time in the bathroom, or waiting for lotion to absorb. Just wear your skincare. Our fibers with integrated active ingredients revolutionize your daily routine. Wear them instead of rubbing them in and save time while providing lasting care for your skin.

Cell Solution® SKIN CARE is natural, effective, and sustainable. Made from wood-based cellulose that is softer than silk, cooler than linen, and more absorbent than cotton.

With vitamin E incorporated directly into the fiber. Proven effective even after 100 washes (e.g., test report no. 14.8.5.0091 from Hohenstein Laboratories GmbH & Co. KG). Care for your skin - no matter where you go.

Cell Solution® SKIN CARE smoothes the skin, promotes healing, relieves itching, protects

against UV rays and free radicals, and regulates the temperature for your personal comfort zone thanks to the integrated Cell Solution® PCM technology.

Cell Solution® SKIN CARE provides skin care that accompanies you. Every day. Reliable. Without compromise.

## Cellulose - a natural product

Cell Solution® is made of wood from sustainable forestry. Cellulose is breathable and regulates moisture. Textiles made of cellulose are more absorptive than cotton, they are silkier than silk and cooler than linen. The fiber naturally absorbs excess moisture and progresses it away from the body. The ability of cellulose to transport moisture is superior to that of the synthetic fiber. The fiber structure supports a pleasant skin climate and is temperature-balancing.
